## SUMMARY

---

Full-Stack Software Engineer with 3+ years of experience building scalable, high-performance web applications. I work across the stack, blending strong frontend engineering with solid backend architecture to deliver reliable, user-focused systems that support real business impact.

## SKILLS

---

- **Languages:** JavaScript, TypeScript, Python, SQL, Perl.
- **Frontend Technology:** React JS, Next JS, Tailwind CSS, React Native, Framer motion, Redux, Zustand, Tanstack, Axios.
- **Backend Technology:** Node JS, Express JS, Nest JS, MongoDB, PostgreSQL.
- **Networking:** Websockets.
- **Testing:** Jest, Unit Testing, Integration Testing.
- **Tools & CI/CD:** Visual Studio, Git, Postman, Firebase, Supabase, Figma, Jira.

## EXPERIENCE

---

### Unshelled Consultancy Limited.

Senior Frontend Developer

July 2024 – Present

Remote, Lagos

- **Lead Frontend Engineer** driving the development of **high-performance, user-centric web applications** across **Fintech, Education, Retail, and Healthcare**, delivering products with **99% uptime**, improved load times, and consistent cross-platform responsiveness.
- Actively **refining product design and development principles**, collaborating with Product Managers/Design to ship features with **clear UX flows, reduced friction**, and a **drop in user-reported issues**, ensuring every feature meets high quality and accessibility standards.
- Focused on **scalable, maintainable codebases**, implementing structure, patterns, and best practices that reduce bugs, speed up onboarding for engineers, and ensure long-term stability for growing engineering teams.

### NEEW.

Full Stack Developer

Feb 2024 – May 2025

Remote, USA

- Developed both the frontend and backend of a full social networking platform, including optimized landing pages built for speed, **SEO performance**, and high conversion rates.
- Implemented core social features such as quick posting, hierarchical (nested) comments on posts and replies, image upload with **automatic optimization and cloud storage**, and robust feed interactions.
- Built **real-time messaging and notifications** using **WebSockets**, ensuring instant delivery, online presence indicators, and a smooth chat experience with **zero page refreshes**.
- Designed **comprehensive user profiles**, including editable account details, media sections, and advanced **KYC verification flows** for secure identity checks.

**Liberty Assured Limited.**

Frontend Developer

**Aug 2023 – Sept 2024**

Remote, Nigeria

- Built the client side of a HR management platform that centralizes key operations, leave requests, promotions, performance reviews, and resignation workflows, improving process efficiency and reducing manual HR workload.
- Integrated a complete e-learning module that enables employees to upskill through courses, quizzes, and progress tracking, resulting in higher engagement and an increase in staff training participation.
- Designed the platform as a user-friendly web application, ensuring seamless navigation, fast load times, and a unified employee experience across all HR and learning features, contributing to a **boost in internal productivity**.

## EDUCATION

---

**University of Lagos.**

Biomedical Engineering

- B.Sc in Biomedical Engineering — 2025

**July 2025**

Lagos, Nigeria
